Yoga is so much more than just “bend and stretch.” Traditionally the yogis are responsible persons and contribute to the welfare of society. This module will teach the students to understand the social aspects of Yoga through the study of Neo Humanism (social philosophy), and its practical implementation called PROUT. We will also look at the necessity of Social Service for one’s personal and collective development. The development of society depends on every individual. MODULE 9 YOGA & CREATIVITY

Objective

Creative expressions add charm and beauty to life. Creativity is a mental process involving the generation of new ideas or concepts or new associations between existing ideas or concepts. These ideas originate from the deeper layer of the mind called Atimánasa Kośa or 'causal mind'. Human desires for mental expansion and realization also originate in this layer of the mind. By engaging oneself in creative expression through arts, music, dance, etc., one's Atimánasa Kośa develops.
